FROM FIANDRE

This modern two-story masterpiece situated on 1.3 acres & surrounded by mature oak trees & lush landscaping. This open layout offers tons of natural light. At nearly 16,000 square feet, the home boasts 6 bedrooms, 8 baths and a guest house. The state-of-the-art kitchen showcases a full suite of luxury appliances. The home features a large living room with fireplace and the spacious formal dining area complete with a glass enclosed wine room. The master suite offers tons of privacy with a spa like master bath and his and hers custom closets. Each guest suite has its own private luxe bathroom. Impact glass doors and floor to ceiling windows offer amazing views. The outdoor 1,000 sq ft covered loggia features a fireplace, summer kitchen, tv, and phantom screens. Florida-based architect Randall Stofft and design team Le Chateau Custom Homes worked with builder, developer and designer Larry Ross to create this stunning contemporary space that focused on utilizing Italian porcelain to beautify this luxury residence. Every room is covered with the sophisticated surfaces, including all bathrooms-- master bath suite, two guest baths, children's bath, cabana bath, and powder room--along with the indoor and outdoor foyers, covered patio, clubroom, kitchen, pantry and breakfast area, garage entrance, laundry room, mudroom entry, for floor and wall applications, and countertops.
